

Survey plug-in

Easily collect feedback, take your company's pulse or start a live poll with the Survey plug-in.

Functionality

The Survey plug-in from T-Systems MMS allows customers to collect feedback on specific topics, events and processes easily and quickly. Buttons, slider and free text elements can be used to create the questions. Users can conduct the survey once and have the evaluation shown to them at the end of they survey. The answers can be exported centrally using a CSV file – of course, with the option of having the data anonymized. All of the content can also be created in multiple languages.

Use case

Because what your employees think counts. The Survey plug-in helps you find out what they think. Pulse surveys to capture the mood of the workforce or classic employee surveys are also conceivable. Such surveys are also worthwhile when the company is undergoing major changes, as a way of gathering feedback from users. Polls can also be quickly and easily integrated into live events.

Availability & price

The Survey plug-in is available for both the COYO Cloud and COYO Private Cloud as of V37 and is priced (based on the license model) from €3,400/ per year.
